

BHUMIK CHOPRA

bhumik.26043@ggnindia.dronacharya.info | +91 8178307875 | linkedin.com/in/bhumik-chopra | New Delhi, India

SUMMARY

Computer science undergraduate skilled in full-stack development with React, Node.js, Flask, and MongoDB. Experienced in building and deploying production-ready applications with AI/ML integrations including OCR pipelines and predictive analytics. Passionate about solving real-world problems through clean, scalable code.

WORK EXPERIENCE

Intern | CNH Technology Services (India) Pvt. Ltd. (Gurgaon-ITC, Haryana) – On-site

Jun 2026 – Jul 2026

- Worked as an Intern in the CWMDT Function at CNH Technology Services (India) Pvt. Ltd., Gurgaon-ITC Location, under the guidance of Rajnish Taneja.
- Contributed to the development of the internal system console portal using React, building and refining UI components for the live web application at systemconsole.cnhind.com.
- Worked on a production-grade React codebase, gaining hands-on experience with real-world enterprise frontend development.
- Demonstrated commendable conduct and made a positive contribution to the team throughout the training period.

KEY EXPERTISE

Languages: C, C++, Python, SQL, R, Java, JavaScript, HTML, CSS

Frameworks / Libraries: React, Streamlit, Hyperledger Fabric, FastAPI, Express.js, Node.js, Flask

Tools: Git, GitHub, Visual Studio Code, Android Studio, Postman, Jupyter, Swagger UI, Docker, EasyOCR, OpenCV, PyMuPDF

Databases: MongoDB, SQLite, SQL

Deployment & Hosting: Vercel, Render, Cloudinary, GitHub

Soft Skills: Problem Solving, Communication, Teamwork, Adaptability, Time Management, Initiative, Attention to Detail

PROJECTS

1. Todo List Application

- Developed a React-based Todo List application with routing, dynamic UI, and persistent storage.
- Integrated an animated Vanta.js background to deliver an engaging and visually appealing user experience.
- Implemented add, delete, and search task features, ensuring intuitive task management across sessions.
- Leveraged localStorage for seamless data persistence without requiring a backend or database.
- Built a fully responsive interface using CSS, ensuring usability across desktop and mobile devices.
- **Technologies Used:** React, JavaScript, React Router, Vanta.js, localStorage, CSS.
- **Link:** <https://todo-list-i9hp.onrender.com>

2. Khanna Khazana – Full-Stack Food Ordering App

- Built to solve a Razorpay problem statement — enabling consumers to view verified kitchen safety standards on food delivery apps, a transparency gap in existing platforms.
- Customer portal lets users browse restaurants, filter by verified safety status, view hygiene trust signals, place orders via Razorpay, and submit complaints.
- Admin and restaurant panels support kitchen approvals, safety document tracking, and restaurant management to ensure a transparent, safety-focused experience.
- Backend built with Express and MongoDB; secured all portals with JWT authentication, Cloudinary for image uploads, and deployed on Render.
- **Technologies Used:** React, Node.js, Express, MongoDB, JWT, Razorpay, Cloudinary, Render.
- **Link:** <https://khanna-khazana-4.onrender.com>

3. Student Management System

- Designed and developed a web application for managing student information and automating registration processes.
- Implemented secure user authentication with account creation, password reset, and record deletion.

- Leveraged Streamlit for a visually appealing frontend and SQLite for reliable, persistent student record storage.
- Integrated an intuitive sidebar menu for quick access to signup, search, record display, and branch-specific management.
- **Technologies Used:** Python, SQLite, Streamlit.
- **Link:** <https://bhaiteracoder.streamlit.app/>

4. Expense Tracker | AI-Powered Expense Tracker

- Developed a full-stack expense tracker using React, Vite, Flask, and MongoDB with secure user authentication via Clerk.
- Built an AI-assisted receipt processing pipeline using EasyOCR, OpenCV, PyMuPDF/pdfplumber, and custom parsing logic to extract amount, date, items, currency, and category from receipt images and PDFs.
- Implemented expense analytics features including category-wise breakdowns, monthly trends, budget tracking, and downloadable CSV/PDF reports.
- Added predictive spending insights with scikit-learn models to forecast month-end expenses, estimate short-term spend, and flag overspending risk.
- Designed a responsive dashboard with manual expense entry, webcam-based receipt capture, theme support, and interactive visualizations for a better user experience.
- Wrote backend regression tests to improve reliability of receipt amount extraction and reduce parsing errors on real invoice formats.
- **Technologies Used:** React, Vite, Flask, MongoDB, Clerk, EasyOCR, OpenCV, scikit-learn.

EDUCATION

Dronacharya College of Engineering Gurugram University, Gurgaon, India	2023 – 2027
Bachelor of Technology – Computer Science and Engineering GPA: 7.8 / 10.0	
Holy Innocents Public School CBSE, New Delhi, India	2021 – 2023
Grade 12 – Senior Secondary: 76% Grade 10 – Secondary: 92%	

CERTIFICATIONS

- C++ – CQS Training Pvt. Ltd., Career Quest Solutions
- Certification in Data Structures and Algorithm – CQS Training Pvt. Ltd., Career Quest Solutions (Aug 2024)
- Foundation Course on IR4.0 Technologies
- UI/UX Designer – Sithub
